**Subject:** RE: Former TRW Microwave Sunnyvale, CA - SAP Deadline Extension Request

I have the name of an attorney at apple who I could contact regarding access but don't know anyone at GI. Was GI the owner when Michael did the apple inspection? If so, he may have contacts.

In advance of providing assistance to gain access, it would be helpful to ask NGC for a summary/chronology of the attempts that it has made to get access (date/format of attempt/who made the attempt/etc) and also get a copy of the access form they were asking to be signed. Also it would be helpful to know dates/scope of access they are seeking (you may already know that).

Let me know if I can help.

Thanks,  
Rebekah

Hello Joshua,

Thank you for your message below and your voice message.

As requested, EPA grants NGC 30 days extension to submit the SAP based on the issues to get access reported below.

EPA can assist with coordination with Apple and GI Partners to conduct this work. Please let us know the contact information you have for both Apple and GI Partners.

Thank you,

Lilian Abreu, PhD

**Subject:** Former TRW Microwave Sunnyvale, CA - SAP Deadline Extension Request

Hi Lilian,

Following up on my VM, I'd like to request an extension to prepare a sampling and analysis plan for indoor air and sub-slab soil gas samples at the former TRW Microwave Site. Over the last several weeks AECOM and NG have attempted to contact Apple (the current tenant at the Site) and GI Partners (the property owner) to coordinate Site access and sampling locations but have not received a response. As such, we will be unable to finalize an SAP within 30 days in response to your latest letter dated 21 July 2022. Please let us know if USEPA can assist with coordination with Apple and GI Partners to conduct this work. Feel free to call me anytime if you have questions.

Thanks!  
Josh
